

HEDIS® Quality Reporting

Healthcare quality improvements make a meaningful difference in people's life. Hexplora, a HEDIS Certified Vendor, offers a Quality Management solution (HEX-Quality Analytics) that provides comprehensive Reporting and Analytics at Population, Provider, and Member level. HEX-Quality Analytics allows healthcare organizations to track Quality Measures across Commercial, Medicare, and Medicaid lines of business including HEDIS, STARS, and State-specific Medicaid measures.

HEX-Quality Analytics Highlights

- ✓ A robust solution to overcome challenges with HEDIS Reporting.
- ✓ Analyze and address STARS and HEDIS measures with predictive analytics and scalable processing system.
- ✓ Seamlessly integrates data, categorizes dashboards and reports based on health plans, overall measure and product lines.
- ✓ Establishes a benchmark across – providers, practices, organizations, etc..
- ✓ Healthcare organizations can rely on the accuracy of quality measure rates and identified care gaps.
- ✓ Collaboratively and seamlessly engage providers in achieving compliance with the quality measures.
- ✓ Providers can track and monitor quality measures and care gaps for their assigned patients directly from the portal or through subscription reports that are automatically emailed to them at selected frequencies.
- ✓ Role-based security ensures that providers can view and access only their assigned patients.
- ✓ Health Plans can view compliance rates based on a rolling prior 12-month timeframe.

Sub Measure Name and ID	Rate	Status	Target	PAFPM	Member Months	Members	Denominator	Numerator
State Therapy for Adults With Cardiovascular Disease - Received Statin Therapy (SPC - HbA1c)	81.81%	●	90.00%	\$4,851	105	11	11	9
Prevalence of Blood Borne Transfusion-Associated Infection (PBT)	56.87%	●	90.00%	\$2,756	72	6	6	4
State Therapy for Adult Patients With Cardiovascular Disease - Statin Adherence 80% (SPC - Metax)	77.78%	●	90.00%	\$2,749	101	9	9	7
State Therapy for Female Patients With Cardiovascular Disease - Statin Adherence 80% (SPC - Female)	65.71%	●	90.00%	\$3,897	84	7	7	4
Comprehensive Diabetes Care (CDC) - Eye Exam (Medical Attention) (CDC - Eye)	90.00%	●	90.00%	\$1,764	1,003	84	84	84
Comprehensive Diabetes Care (CDC) - HbA1c Control (≤9.0%) (CDC-Hb)	84.00%	●	90.00%	\$1,764	1,003	84	84	70
Comprehensive Diabetes Care (CDC) - Medical Attention for Foot Ulcers (CDC - Foot)	97.00%	●	90.00%	\$1,764	1,003	84	84	82
State Therapy for Female Patients With Cardiovascular Disease - Received Statin Therapy (SPC - Female)	70.00%	●	90.00%	\$1,056	100	10	10	7
Comprehensive Diabetes Care (CDC)	92.00%	●	90.00%	\$1,100	2,081	160	160	144
Medication Adherence for Oral Diabetes Medications (MAO)	88.85%	●	85.00%	\$1,080	2,217	275	275	246
State Therapy for Patients With Diabetes - Statin Adherence 80% (SPC)	83.33%	●	90.00%	\$1,080	978	85	85	71
Diabetes Medication and Allowable Drug Therapy for Rheumatoid Arthritis (DR)	6.00%	●	90.00%	\$1,008	14	2	2	0
State Therapy for Patients With Diabetes - Received Statin Therapy (SPC)	84.00%	●	90.00%	\$1,015	1,811	156	156	132
Cardiac Care Screening (CCS)	26.00%	●	90.00%	\$987	405	17	17	14
Medication Adherence for Hypertension (MAH)	25.00%	●	84.00%	\$955	4,233	532	532	288
Medication Adherence for Hypertension (MAH)	37.78%	●	85.00%	\$915	31	17	17	12
Total	72.45%	●	86.45%	\$700	81,453	1,403	6,408	3,113

Measure ID	Rate	Status	Target	Denominator	Numerator
CDC	100.00%	●	89.00%	9	9
Comprehensive Diabetes Care (CDC)	100.00%	●	90.00%	3	3
Comprehensive Diabetes Care (CDC) - Eye Exam (Medical Attention) (CDC - Eye)	100.00%	●	83.00%	2	2
Comprehensive Diabetes Care (CDC) - HbA1c Control (≤9.0%) (CDC-Hb)	100.00%	●	86.00%	2	2
Comprehensive Diabetes Care (CDC) - Medical Attention for Amputations (CDC-Amput)	100.00%	●	99.00%	2	2
BCS	64.71%	●	78.00%	17	11
Breast Cancer Screening (BCS)	64.71%	●	78.00%	17	11
MAO	90.00%	●	85.00%	8	7
Medication Adherence for Oral Diabetes Medications (MAO)	90.00%	●	85.00%	8	7
SFD	50.00%	●	80.00%	4	2
State Therapy for Patients With Diabetes - Statin Adherence 80% (SPC)	100.00%	●	90.00%	1	1
State Therapy for Patients With Diabetes - Received Statin Therapy (SPC-1)	33.33%	●	90.00%	3	1
COL	18.18%	●	84.00%	11	2
Colorectal Cancer Screening (COL)	18.18%	●	84.00%	11	2
MAH	16.67%	●	84.00%	12	2
Medication Adherence for Cholesterol (Statins) (MAH)	16.67%	●	84.00%	12	2
ABA	11.54%	●	85.00%	28	3
Adult BMI Assessment (ABA)	11.54%	●	85.00%	28	3
MAH	11.11%	●	85.00%	9	1
Adult BMI Assessment (ABA)	11.11%	●	85.00%	9	1
Total	20.35%	●	88.36%	142	16

HEX-Quality Analytics Functionality

Quality reporting can maximize the output in following ways:

- Monitoring of Quality Measures including HEDIS and STARS
- Identification and tracking of Quality Care Gaps across time
- Comprehensive Analytics for tracking of cost and utilization by measure
- HEDIS measure Tracking, Reporting, and Submission

*HEDIS® is a registered trademark of the National Committee for Quality Assurance (NCQA).

Monitoring of Quality Measures including HEDIS and STARs:

- Data-driven quality analytics empowers healthcare organizations to seamlessly monitor the HEDIS score to make proactive interventions and to meet regulatory requirements.
- Measure end-to-end care effectiveness at provider-level across all healthcare organizations located at different sites in a centralized platform.
- Provider networks can generate insights to be in the know of care gaps to create more engaging programs while meeting the HEDIS and STARs rating.

Identification and tracking of Quality Care Gaps across time

- Comprehensive Quality Tools help healthcare organizations to give high-quality care to all patients.
- Meet every quality compliance measure by providing a 360-degree view of patient' care.
- Consolidated clinical and claims records in one location – in all likelihood – clears up the ambiguity and motivates care management team to pinpoint the reasons for lacking in HEDIS quality measures.

Comprehensive Analytics for tracking of cost and utilization trends by measure

- In-depth analytics enable healthcare authorities to discover underlying trends and possible interventions which were overlooked in unstructured patients' records.
- Analytical reports motivate coordinated teams to create impactful Managed Long-term Care (MLTC) programs for chronically ill patients.
- Customizable solution aims to improve patient engagement that improves patient compliance which in turn exponentially increase financial outcome.

HEDIS measure Tracking, Reporting, and Submission

- Health plans can continuously measure the performance of healthcare providers across all domains of HEDIS and critical dimensions of care.
- Comprehensive reporting gives full transparency into numerators, denominators and exclusions bridging the gap between patients and providers.
- Hexplora ensures provider data submission complies with annual updates in measurement sets and enables to make state-specific submissions.

“Hexplora’s goal is to empower healthcare organizations
to achieve Better Health through Better Insights”
